

## **STAY SAFE AT BYB**

2021 COVID-19 Guidelines

### **Spectators in the Park**

If you identify as high-risk according to the CDC or are immunocompromised, BYB advises you do not attend games. All spectators are encouraged to wear masks per CDC recommendations.

No children should be playing on fences, open areas, roadways, or open fields. Children from different households must keep social distance from one another. Please practice social distancing.

### **Concessions**

Concessions will be available in 2021. We take the safety of our membership very seriously. Concession staff members will be following CDC guidelines and health department guidelines required for food safety. Please follow CDC guidelines when visiting our stands. Please be mindful and throw trash away in the garbage cans.

### **Celebrations**

Although sportsmanship is important, games will not end with the customary handshake line. Instead, both teams will line up a minimum of 10 feet apart and participate in a simultaneous "cap tip" to replace the handshakes.

### **Symptoms**

The CDC recognizes certain symptoms as potential signs of COVID-19. If a person demonstrates any of these symptoms, some of them, or all of them, that person should stay home in isolation until being 100% symptom free for 72 hours. Those symptoms are a consistent, dry cough; shortness of breath or respiratory issues; or a fever of 101 or higher. If you have knowingly been exposed to COVID-19, please follow guidelines and self-quarantine for 14 days.

### **Batting Cages and Common Areas**

These areas may be utilized following social distancing guidelines set in place by the CDC. Keep groups to 10 or less, avoid close contact, and do not share items.

### **Umpires**

As a safety precaution, umpires will be asked to wear a mask while officiating games.

### **Drinks For Players**

Group or shared water/drink coolers or bottles are prohibited. All players should have their own bottled products as needed. Sunflower seeds are banned at the facility until further notice.

### **In the Event of Exposure or Positive COVID-19 Test**

The following steps will be taken in the event of a self-reported exposure or a positive COVID-19 test:

- a. Person(s) exposed will self-quarantine for 14 days, or get tested and quarantine until results are received.
- b. If positive test, self-quarantine for 14 days. Person(s) must be symptom free for 72 hours before returning AFTER the 14 day self-quarantine.
- a. If self-quarantines cause a team to be short on players (less than 7), that game will simply be canceled, with no win or loss issued to either team.
